

# Interview Portal (SRS) Document

## Brief problem statement:

This project is about building an **Interview Portal** where mentee can collaborate with mentor for a mock interview and seek feedback based on performance.

## Technologies:

Front-end : HTML, CSS, React JS.

Back-end : Django

Database : MySQL

Hardware : Linux

## Users Profile:

Admin : Admin can schedule / cancel any interview.

Interviewer : Fill / Delete available time slots, write feedback to mentee.

Interviewee : Schedule / Cancel interview and check feedback.

## Feature Requirement:

**Following are features that which are currently including in project development**

No.	User Case Name	Description
1	Sign In/Sign Up	Mentor and Mentee should sign in or register to use the portal.
2	Admin Interview Schedule	In Admin Interview schedule form Admin can schedule interview with mentor and mentee or can cancel previously scheduled interview.

3	Add mentor	In add mentor form admin can add or remove any mentor from the list of mentors.
4	Slot availability	Mentor can fill the slot for interview according to his availability.
5	Feedback	Mentor can give the feedback to student. Based on Communication skills, Problem solving etc.
6	Slot Booking	Student can choose any slot for giving interview.
7	Email Confirmation	Confirmation mail is sent to both the interviewer and interviewee after slot booking.
8	Student Profile	Student can see the slots booked for interview by him and feedback given by the interviewer and his progress report.
9	Mentor Profile	Mentor can see the slots booked.
